How are events in your life? I just received my third verjungen injection to repair the negative effects in my body so I can be guaranteed to live to be 120. All the bad choices I made in the past are wiped out! I am feeling so refreshed and rejuvenated with an incredible amount of energy. I hope you decide on this series of six shots.

My niece, Pasiphal 6187T42, informed me that her educational site had dropped another language: Italian. So now she only has to learn the seven main languages – Chinese, German, Spanish, English, French, Russian and Japanese. I can't believe it! I had to learn twelve languages when I was young.

I'm starting a new art class next month. My current dream is to paint the outside of the next space glider to leave. Just imagine my mural in outer space!

Which reminds me of your dream. Did you take the earth glider to the top of Mt. Everest? How was it? Did you leave a memento at the top? What will your next dream activity be? Perhaps you could learn how to pilot a space glider. I think my next dream might be to live on the bottom of the ocean for a year with the Praxidike sea commune. It would be totally different from the Calypso commune. Perhaps I'll find another ocean romance. Well, here's to your personal paradise. May it be full of peace and happiness.
