

The Blue Wave in Colorado 2018

by Harry Zirkelbach November 12, 2018

Stars and Sun date 35221

The Denver 1948 official Census for Colorado was 132 million. One percent of the USA population lived in Colorado. Giving us that percent of the HOUSE OF REPRESENTATIVES,, four

The recent USA Census is estimated to be 326.7 million, Colorado at 5.020. or 1,54 percent of the population. This would provide for seven House Representatives. Our population growth, that much more than the nation. A great State.

Each State has equal representation in the Senate. Tiny Wyoming two Senators, the same as the sprawling, every growing California. The Senate has always held a charm for me. Because,

Imagine the Senate being represented by 50 Republicans and 50 Democrats. A challenge to Administer, But then imagine the Senate is divided 51-49. Now a two vote difference. Reminding everyone, their vote counts twice,

for the candidate of their choice, and one against his opponent.

In the 2018 General elections, many a victorious candidate had slim margin victories. The importance of every vote, and that every registered voter exercise their right. In Colorado that meant filling out the ballot Mailed each Registered Voter, getting it to a collection spot. No going to the Precinct, waiting in line, using a machine to cast the vote. The pen the only tool needed to e counted.

We along East Center Avenue abide in Precinct 542. In the accounting for the votes in 2016 General Election, this Precinct had the Highest Percent of votes of Registered Voters in Denver. While Windsor Gardens voters are well known for the willingness to choose and vote, this was an extra. Highest in Denver.

So that Democratic Committee tried to increase this participation by urging all Registered Voters to cast their vote in 2018. None should be discouraged to Vote.

On a like note, Windsor Gardens held an election about the same time, for Representation on the Board of Directors. That election was decided by 45.9%; And in fact that vote is not in the spirit of Democracy. Each Unit is authorized the number of vote equal the seats to be filled. So those of you who are single (the majority) had three votes, while my wife and I had also three. In effect

making the single person vote twice the value of ours. Windsor Gardens, not home to the OneMan One Vote demanded our Constitution. And this other oddity, while women swept into control in State after State, only one of the three women candidates were chosen to represent the majority of women Windsor residents.

Politics is unpredictable. Windsor Gardens election was cordial, gentle; across the nation scallywags railed against ruffians everywhere, to listen to the TV commercials. But the Republic and Windsor Gardens survives

Voting works no matter the rules.
