

## *Simplicity is Everywhere*

*Stars and Sun date 34456*

*by Harry Zirkelbach*

Do you have a cell phone, computer, email? Found that difficult to master at times.? Consider, everything therein is based on the most simple concept., the binary numbers. Everything is either one or zero  
(might be considered a plus or minus, even yes no).

Try to imagine the years of study, the men and women involved, the trials and tribulations, just to have it possible for me to type this word, Simplicity.  
There was nothing simple about it.

So in a ever increasing complex world, we are aided in understanding, competing, surviving, coping, by accepting that we are adrift in world we did not make, will never understand, yet demands our acceptance of so many things we find disagreeable.

What shall a person do? Smiling, mouth shut, gives times to contemplate.

And, regardless of age, sex, religious affiliation, it is a blessing to keep life simple.

Those choosing Windsor Gardens as home have made a significant first step.  
For the concept here is the Good Life for those ripened beyond 54 years.  
Basic to that choice, come here to live, not die. To that end, consider involvement in the daily routine; you choose. There are more than fifty considerations. In any group or gathering you choose, become involved. All this begins when as a United States citizen, Register, vote every election.

No need to be perfect. Just do your best. Smiling and listening helps.  
The old saw applies, you never learned anything when you were talking.  
Happiness and simplicity are friends, can be found everywhere.  
Enter the dialogue. Balance the yes and nos. Uncertain, choose yes.  
That's simple enough.
