

## BULLHOG ON A SESAME SEED BUN

*By Joan Black*

Hybrid animals - the kind dreamed up by those of us with a vivid imagination and entirely too much time on hand.

Think of the convenience of pairing the genes of an Angus Bull with those of a Groundhog ... Ta-Da! Ground Bullhog!

The Groundhog is also known as a Wood Chuck – which begs the question: "How much wood would a Wood Chuck chuck if a Wood Chuck could chuck wood?"

... and the answer is – maybe enough wood to start a fire to cook a Bullhog burger.

As to WHY we would want such an amazing Hybrid? Well, heavens to Betsy folks, I'm offering you a packaged deal of Ground Bullhog and a fire to cook it over – what more do you want?
