

A GIFT FOR LIFE
By Josephine Easterling

A gift for life is given to each and every person. It's how you view this life, and how you use this gift, it can be so personal. Because it's yours to use, and not to give away. A gift is received in many ways. A special occasion, it can be an anniversary, perhaps for a loved one, or maybe a friend's. This is a special honor for every year.

Perhaps you receive a book as a gift, you put it away. However, one day you decided to read it. These other thoughts are so real in this book; it can change your life and personality: revive you and make you new in life. Family members give gifts to their mother and children. You may receive a gift any time. The gift of life has so much meaning. For the body of life, we have the ability to use our brain for thinking power. To be able to speak and have a voice. To have arms, and hands. To use our legs, and feet to walk with. We would miss them. Our heart is a moving body, the muscle of the body is what makes us whole. So be thankful for good health, to have all of our body inside and out. Taking a deep breath everyday is a source of life. Remember these walking bones with love.

The thigh bone connected to the back bone, the neck bone connected to the head bone, the leg bone connected to the foot bone, these bones are made for walking. Most of all may we be able to mark with survival, with love of life. Life is so precious no one wants to lose it. If we let our conscious be our guide to make important decisions for life. Passing on to your love ones fully dressed with these boots on.

You manage to take care of them through sickness and death. So may your wishes and plans for this live and beyond be fulfilled.
