

My Vision of the Future

by Liz Gibbons

Why is there so much chaos going on the world? This is my understanding of what is occurring. There are two shifts taking place. One is the transition from the Piscean Age into the Age of Aquarius. The Piscean Age was dominated by hierarchy and power. In contrast, the Age of Aquarius is the age of information. The Piscean Age was organized in a vertical hierarchy whereas the Aquarian Age is organized in a horizontal manner, making true equality possible.

In the Piscean Age the keys to success were hidden and you learned them by following leaders or guides whether they were a religious authority, a charismatic leader, a political ideology, or some other type of teacher. The Aquarian Age is dominated by networks of people and information. Answers are available at your fingertips. You no longer have to attach yourself to another for guidance, for you become the leader of yourself. Because of this there has been a huge movement in the last fifty years of self-improvement, self-help, yoga, meditation, alternative healing, natural foods, etc.

The second shift is a shift in consciousness from a third dimension reality to a fifth dimension reality. Dimensions are states of consciousness with each dimension vibrating at a different frequency. To illustrate the difference, Newtonian physics is third dimension science and quantum physics is fourth dimension science.

These shifts are being driven by two Waves of Light. One is expanding our consciousness by rewiring our DNA and transforming our electromagnetic frequencies to align us with a higher awareness. The other wave is creating harmony by dismantling and dissolving old beliefs, emotions, and lifestyles that are blocking us from being who we really are. These waves work in tandem, one expanding and the other dismantling. Thus new choices and new realities are replacing old beliefs.

This awakening is affecting every aspect of our lives. Life will evolve in ways we cannot even imagine. The nature of man's awareness will affect the outcome. Change will be challenging at times. These are some of the more obvious possible changes I envision.

With a higher consciousness we will be heart centered and create a world that meets the needs of all people. No one will be without food and shelter. Food forests will become prevalent where fruit and nut bearing trees, vines, and perennial vegetables will be available for anyone to pick. Children will be taught from birth onward who they really are, "spiritual beings having a human experience," as Pierre Teilhard de Chardin so aptly described. People will realize that we are all one; that we have merely put on different colored suits for our earth experience. Wars will eventually cease. Crime will be rare. The medical profession will itself die as we return to nature's laws for keeping our body healthy. Free energy will be available enabling the earth to get off the grid. New technologies that develop will be utilized in the best interest of society and our planet. Education will change radically. We have to ask ourselves why we put up with spending years in school to prepare us for a system where we work for the rest of our lives to provide food and shelter instead of following our passions and desires. The monetary system

will be eliminated. The need for governments will be minimal as people self govern. Life spans will lengthen greatly.

Our existing model for earth is obsolete. Mankind has the potential to create a far better model. What will it be?
