

Showers Galore

By Natalie Lawson

Smiles and wonders come with baby showers. Wedding showers are the beginning of new adventures. There are all kinds of different showers. I've been through them all. One kind of shower that comes without an invitation: the calming and cooling rain showers.

The significance of a rain shower is the wonderful rainbow that entertains us with envisagement so completely in our minds. Recapturing the happy times when the children were young running into the house ending a race with the rain. Laughter and squeals follow their stomping feet. After a hot chocolate they are settled down with color books and crayons.

Truly bliss with a capital "B"!
